

New installation

Remodel or new construction

Rooms filled with natural light and fresh air are invariably more beautiful, spacious, and uplifting to your spirits. Daylight is the essential element that transforms conventional rooms into splendid spaces. VELUX skylights let you bring the best of the outdoors inside.

Skylight replacement

Three great reasons to replace skylights when you replace a roof

- **1. Save money** The most convenient and affordable time to replace a skylight is during re-roofing.
- **2. Coinciding warranty** You're getting a new roof with a warranty, why not replace your skylight and enjoy one there as well.
- **3. Improved energy efficiency** Advanced LowE3 coating that provides more daylight and better heat control.

Energy efficiency

Most VELUX products are ENERGY STAR® qualified in all 50 states. Improve energy efficiency even further with our Energy Performance Model. (see page 12)

Choosing the right glass

Recommended for out-of-reach applications

Clean, Quiet & Safe glass

Clean

Features Neat® glass coating to keep your skylight cleaner longer, leaving skylights virtually spotless.

Quiet

Reduce unwanted outside noise by up to 25% compared to a standard double pane glass and up to 50% compared to a plastic skylight.

Safe

VELUX recommends and building codes require laminated glass for out-of-reach applications.

Clean, Quiet & Safe also available in impact, white laminated and snowload types of glass.

Recommended for in-reach applications

Tempered glass

Consists of a dual pane, triple-coated with LowE3, dual-sealed and injected with argon gas.

Fresh air skylights help your home breathe, bringing in fresh outside air to maintain good indoor air quality. Warm, stale air is let out, which can help lower energy costs.

Solar-Powered "Fresh Air" Skylight

The ideal way to bring natural light and fresh air into your home and the logical choice for any skylight installation. With no need for wiring, it's perfect for new installations or skylight replacement.

- Allows complete control with intelligent touch remote
- Available in deck and curb-mounted applications

No Leak Warranty

VELUX brand skylights are the world's most trusted brand of roof windows and skylights. Most of our skylights have the 10-year installation warranty.

This is achieved by our three layers of water protection.

- The pre-attached skylight gasket provides a seal between the roof and the skylight.
- Adhesive underlayment for secondary water protection against the harshest weather conditions.
- Engineered flashing for easy installation and primary water protection.

The No Leak Skylight™

• No Leak Promise • No Worries

Installation methods

Deck-mounted

- Skylight with insulated glass lens
- Built-in wood frame
- Mounts directly to the roof deck.
- Engineered flashings integrate with roofing material (sold separately)

VELUX flashing must be purchased in order to qualify for the 10-year installation warranty.

Curb-mounted

- · A durable metal frame
- Mounts directly to a site-built curb
- Engineered flashings are available for use with site-built curbs for a weather-tight installation (sold separately)

VELUX flashing must be purchased in order to qualify for the 10-year installation warranty.

Self-flashed

- Pre-attached pan flashing that mounts directly to the roof deck
- Requires roofing sealant for a weather-tight installation

VELUX Sun Tunnel

- Reflective tunnel
- One-piece flashing system
- Mounts to the roof deck

Skylight types

Deck-mounted - Model VSS Curb-mounted - Model VCS

Solar-powered fresh air skylights

- Features a solar panel to recharge battery-powered operator and control system.
- Integrated rain sensor closes the skylight automatically, in case of inclement weather.
- VELUX INTEGRA® remote control included. Easy-to-use touch screen with descriptive icons.

*For more information visit veluxusa.com/taxcredits

Deck-mounted - Model VSE Curb-mounted - Model VCE

Electric fresh air skylights

- Single hard wire connects into a standard junction box.
- Integrated rain sensor closes the skylight automatically, in case of inclement weather.
- VELUX INTEGRA® remote control included. Easy-to-use touch screen with descriptive icons.

Deck-mounted - Model VS Curb-mounted - Model VCM

Manual fresh air skylights

- Opens and closes manually with VELUX control rods for out-ofreach applications and smooth turning handle for in-reach applications. (Sold separately)
- Energy performance model available.

Deck-mounted - Model FS Curb-mounted - Model FCM Self-flashed - Model QPF

Fixed skylights

- Economical choice to transform dark spaces with natural light.
- Energy performance model available.

and installation

VEN

V Factory-installed solar blind

Double-pleated, room darkening blind boosts energy performance up to 40%. (Color options on page 12)

✓ Intelligent touch
remote control
Simple set up for seasonal

automation.

Seasonal automation optimizes energy efficiency

Automatically optimizes energy performance with control of blind positioning and programming.

Blinds automatically close at night to reduce heating costs.

Blinds automatically close during the daytime to reduce cooling costs.

Improves energy performance rating by up to 40%

Blinds

Complete light control

VELUX blinds allow you to control the light, enhance your decor, and improve energy efficiency.

Room darkening, double-pleated blinds

- Blackout cloth with honeycomb structure
- Neat pleats

Colors available for Energy Performance Models

Light filtering, single-pleated blinds

- Softens incoming light
- Neat pleats

Classic sand

Cappuccino

Lovely latte

Misty brown

Factory-installed blinds

We now offer the option of ordering most fixed and "Fresh Air" skylights with blinds pre-installed. This reduces the time on the job and simplifies the skylight installation.

Flashing systems

Our engineered flashing provides a weather-tight installation, and is required for the **No Leak warranty**.

Deck-mounted flashing

Shingles/shakes - EDL

- Step flashing pieces interweave with roofing material for proper water drainage.
- Additional step pieces (ZZZ 200) are required for shakes and other thick roofing materials.

Tile roofing - EDW

- Patented-sill flashing features pliable pleats that form to most types of tile.
- Side and head flashing pieces form a gutter to direct water away from the skylight.

Metal roofing - EDM

- Flashing pieces interlock with roofing material for a fast, weather-tight installation.
- Sill apron features pliable pleats that form to the roof.

Other flashing options available

- Copper cladding and flashing
- · Combi applications
- Biepack flashing Type ECB

Curb-mounted flashing

Shingles/shakes - ECL

- Step flashing pieces interweave with roofing material for proper water drainage.
- Additional step pieces (ZZZ 200) are required for shakes and other thick roofing materials.

Tile roofing - ECW

- Patented-sill flashing features pliable pleats that form to most types of tile.
- Side and head flashing pieces form a gutter to direct water away from the skylight.

Sun Tunnel skylights

Why tubular skylights?

- VELUX Sun Tunnel brings natural light into the darkest and most isolated spaces through a specially designed tunnel from roof to ceiling.
- Rigid and Flexible tube available.

14-in - Model TLR

Rigid tube / Flat glass

- Low-profile design creates a sleek appearance on any roofline.
- Perfect for developments where local ordinances do not allow acrylic dome tubular skylights.
- Available in 14-in rigid only.
- · Prefabricated light tunnel makes it easy to install.

10-in - Model TMR, TGR, TSR 14-in - Model TMR.

TGR, TCR

Rigid tube / Dome

- Pitched flashing (TMR); provides optimum angle for gathering light from all directions.
- Also available with low-profile flashing (TGR, TSR) or curb-mounted flashing (TCR).
- 99.99% silver reflective layer with a 20-year tunnel warranty.
- Super energy efficient models available.

Flexible tube / Dome

- Pitched flashing (TMF); provides optimum angle for gathering light from all directions.
- Available with low-profile flashing (TGF).
- The flexible tunnel can be installed quickly around attic obstructions.
- Super energy efficient models available.

14-in - Model TMF, TGF 22-in - Model TGF

Sun Tunnel accessories

Light kit for Sun Tunnel skylights (Model ZTL)

Manual blackout shade for the 10-in and 14-in Sun Tunnel skylights (Model ZTK)
